# INTRODUCTION

Based on various challenges besetting most public sector institutions, especially local government, the need was identified for full automation of supply chain management processes for municipalities and municipal entities in South Africa. This need was addressed in a form of a solution called **IEMAS – Supply Chain Management (SCM)**.

IEMAS-SCM is not a financial or accounting system, but a process flow and compliance management system that serves as an integrated solution to ensure a complete, compliant and auditable end to end supply chain management processes. **IEMAS-SCM** can integrate with your municipality's or municipal entity's current financial system for optimal results.

**IEMAS - SCM** was fully custom developed in South Africa, by young entrepreneurs and it is a wholly black owned product.

# OVERVIEW

**IEMAS – SCM** includes an interactive database of suppliers and a full circle process system that manages all various Supply Chain Management processes from the initiation of a procurement process up to disposal management, with unlimited reporting capabilities for any activity within the procurement cycle.

**IEMAS - SCM** is fully compliant with the framework for procurement in terms of:

- Part 1 of Chapter 11 of Municipal Finance Management Act 56 of 2003, (MFMA),
- The Municipal Supply Chain Management Regulations of 2005,
- Preferential Procurement Regulations, 2011,
- SCOA Regulations of 2014 and
- The revised BBBEE Codes of Good Practices that came into effect on 1 May 2015.

# CONTACT

If you would like to know more about **IEMAS-SCM** or if you would like to arrange for a live demonstration of **IEMAS-SCM** at your municipality, please contact one of our representatives:
